## DETAILED ACTION

1. Claims 1-20 in condition for allowance.

2. The following is an examiner's statement of reasons for allowance: The prior art(s) of record does not disclose alone or in combination the following:

Regarding Claim 1. The first and second controlled switch having a second terminal, a control input, diode connected in shunt across the power terminal, a power capacitor having terminals connected to the second power terminal of the first and second controlled switched elements.

Regarding Claim 8. The first and second controlled switch having a second terminal, a control input, diode connected in shunt across the power terminal, a power capacitor having terminals connected to the second power terminal of the first and second controlled switched elements, a first and second power capacitor having a first and second terminal as explained and expounded on in claims 8 of the present invention.

Regarding Claims 13, 17 and 20. The variable drive circuit includes a control circuit having sensor inputs coupled across the load to output means for continuously monitoring, providing gating signals for selectively gating the switch element of the controlled switched bridge and controlling the waveform and frequency of the power applied to the load.

Regarding Claim 14. The variable drive circuit includes a control circuit having sensor inputs coupled across the load to output means for continuously monitoring and controlling the waveform and frequency of the power applied to the load and includes first and second optically

driven switch circuits each coupled between a respective AC input conductor and a respective output conductor of the output means, and a pair of diodes connected across current-carrying conductors of said first and second optically driven switch circuits.

Regarding Claim 18. A controlled switched bridge includes a bridge element having at least first and second AC inputs, and DC terminals, and a switch element connected across the DC terminal of the switched bridge, means in series with the AC conduction for coupling across an armature of the AC induction motor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
